

P.F. Chang's Saves Millions In Capital, Expenses & Time

How Intelligent Protection Management helped P.F. Chang's

Prior to working with Intelligent Protection Management, P.F. Chang's hosted and maintained their own physical hardware infrastructure at a leasing data center in Phoenix, AZ. This data center required costly upgrades and time-consuming maintenance by their internal IT team, which necessitated a significant capital expenditure of **\$1.2M to upgrade**.

The physical replacement proved to be costly and time-consuming, which prompted P.F. Chang's to seek a partnership with Intelligent Protection Management to save time, money, and headaches.

Reduced IT Hours by 30%

With IPM taking over the monitoring, management, and remediation services of the hardware platform with our Dedicated Private Cloud Infrastructure, substantial time savings were gained by P.F. Chang's IT team so they could focus on core tasks and strategic initiatives.

Enhanced Security & Compliance

By migrating to Intelligent Protection Management's modernized infrastructure with Backup & Disaster Recovery, P.F. Chang's easily scales with the demands of their business, has higher resiliency to site loss and ransomware, and protects their business data when unexpected failures occur.

In 4 months, Intelligent Protection Management saved P.F. Chang's

\$1.2M in capital expenses,

\$130K in annual expenses and,

reduced IT work hours by approximately **30%**
