

DESKTOP JUMPSTART

THE GO-TO FIRM FOR:

Windows Migrations

Virtual Desktop

Infrastructure (VDI)

Cloud Strategy & Design

Data Center Services

IT Staffing

DESKTOP OPTIMIZATION USING WINDOWS AND MICROSOFT OFFICE

The Desktop Jumpstart solution helps customers understand the migration process to Windows® 7 operating system and Microsoft® Office 2010 using a highly structured approach based on a proof-of-concept environment to demonstrate key deployment concepts, including application compatibility, deployment techniques, virtualization, and Office 2010 deployment.

HOW IT WORKS

IPM offers this fixed-scope and limited-time engagement for a typical duration of three (3) days. To maximize return on investment (ROI), the offering is implemented in conjunction with your resources (personnel, intellectual investments, and existing infrastructure) when possible. The engagement provides decision-making expertise based on technical considerations and an up-to-date Microsoft project roadmap, which considers your business and technical requirements.

SOLUTION BENEFITS

- Provides organizations with the opportunity to test the latest features of Windows 7, Internet Explorer® 8 Internet browser, and Office 2010, and how Application Virtualization (App-V) works toward meeting specific business and IT goals.
- Helps information technology (IT) departments assess their environments and build confidence before installing the products in a production environment.
- Defines requirements and success criteria, and establishes overall direction, including budget estimation.
- Guides implementation through use of best practices, product expertise, and implementation experience to generate higher efficiency.

IPM offers the expertise and resources to support a successful migration to Windows 7, Internet Explorer® 8, and Microsoft® Office 2010, and implementation of App-V capabilities by means of consistent, reproducible processes and tools that can improve efficiency and require less effort to maintain.

To discuss the Desktop Jumpstart solution, contact your IPM representative directly, email Microsoft@ipm.com or call 800-476-1155.

STANDARD SCOPE

The Desktop Jumpstart solution will include a series of workshops and lab demonstrations to help you evaluate Window 7, Internet Explorer 8, Office 2010 and Application Virtualization. To enable a successful Desktop Jumpstart, the solution is limited to three (3) days. The scope will be limited to the following:

- Optimized desktop business value understanding, and economic justification
- A series of workshops and tool demonstrations focusing on:
 - Standard Image creation
 - Thin Windows 7 Image deployment
 - Windows 7 security high-level review
 - Application Virtualization solution overview
 - Application compatibility and assessment, including demonstration of shimming
 - MAP Toolkit
 - Assessment of five (5) of machines using Microsoft Assessment and Planning (MAP) Toolkit
- Office Migration Planning Manager (OMPM) Demonstration
- Creation of a single operating system image in a test environment that includes Windows 7 Enterprise, Office Professional Plus 2010.
- Include a Microsoft Application Virtualized (App-V) virtualized Office Professional Plus 2010 (pre-sequenced)
- Deployment of image to a limited number of machines in a test environment not to exceed five (5) machines
- Testing of features within Windows 7 Enterprise, Internet Explorer 8, Office Professional Plus 2010, and Application Virtualization (based on availability)

IN-SCOPE FEE: \$5,000 (3-day)
