

# IPM Unifies and Safeguards 80+ Locations for Meritus Gas Partners

## Intelligent Protection Management Merges Meritus' IT Landscape

After years of acquiring independent distributors in the industrial, medical, and specialty gas industry, Meritus Gas Partners has now established a national network of products and brands.

This success came with a downside: inherited IT complexity. Meritus acquired more than 80 unique locations, all supported by their legacy IT partners and ad hoc developers. This tangled IT landscape slowed employee productivity, hampered essential IT developments, created cybersecurity vulnerabilities, and obstructed opportunities for future growth.

That changed when Meritus partnered with Intelligent Protection Management (IPM).

### Merged Fractured IT Landscape

IPM immediately unified Meritus' diverse IT stack across all 18 of its companies and 80+ locations. Now, Meritus team members can make changes, request updates, or seek support across their entire digital portfolio with just one point of contact.

### Provided Managed Security and IT Services

As a multi-year partner, IPM provides essential Managed Services across the Meritus portfolio, including security stack oversight, firewall monitoring, and full help desk and remediation services. As Meritus continues to grow, it will operate with the confidence that its valuable data is under constant threat protection.

## Since October 2024, Intelligent Protection Management has supported Meritus' growth:

**Standardized threat protection**  
via security stack oversight,  
firewall monitoring, and server  
and system management

**Strengthened help desk services**  
with comprehensive IT support  
and remediation

**Optimized IT investments**  
through strategic IT oversight and  
collaborative ERP integrations

## IPM has scalable, tailored technology solutions
